EXPERIENCE

Swalook

Remote

Full Stack Developer

February 2024 – Present

- Engineered a comprehensive CRM platform during my internship, expanding functionality to include 5+ sub-branches, optimizing appointment bookings by 30%, generating 100+ bills weekly, and integrating advanced business analysis tools and a customer loyalty program, which increased client retention by 15%.
- Designed a bulk SMS application that enabled the dispatch of 500+ promotional messages daily, resulting in a 20% rise in client engagement.
- Integrated 3+ automation bots, significantly enhancing the platform's functionality by cutting manual tasks by 40% and boosting overall efficiency.

BombayCat Films

Remote

Full Stack Developer

July 2023 – September 2023, Freelancer

- Constructed responsive frontend components, including user-friendly signup and login interfaces, which improved user registration efficiency by 25% and decreased login issues by 30%.
- Designed and deployed a recruitment platform for organizational management, streamlining the processing of 200+ applications weekly, automating candidate tracking, and reducing time-to-hire by 20%.

IIIT Vadodara

Gandhinagar

Web Developer

October 2023 – November 2023

- Directed the development of the institute's 5th convocation website, ensuring a seamless user experience and timely delivery. The website facilitated registrations, provided real-time updates, and showcased event details. | [Link](#)

PROJECTS

Gourmet | [GitHub](#)

- Created an interactive website to showcase local businesses, enabling users to order food and take away, which increased online orders by 35% and improved user engagement by 40%.
- Tools & technologies used: ReactJS, Bootstrap, MUI, NodeJS, ExpressJS, MongoDB, Framer Motion

AR Chat | [Deployed Link](#)

- Engineered an innovative concept to revolutionize virtual communication, transforming 2D chats into immersive 3D experiences with emotion-responsive avatars; attributed to 75% of the idea's distinctive appeal.
- Tools & technologies used: NodeJS, ExpressJS, SocketIO, ReactJS, MongoDB, C#, REST API

Car Rental | [GitHub](#)

- Designed and implemented a comprehensive system to manage rental cars from both supplier and retailer perspectives, effectively automating key processes. This solution reduced the overall workload by approximately 50%, optimized resource allocation.

AWARDS & ACHIEVEMENTS

Hostel Management System : Idea accepted by IIIT VADODARA under SSIP Gujarat Program in 1st category (March 2023)
